NATIVE SEEDS & PLANTS FOR GARDENING AND RESTORATION

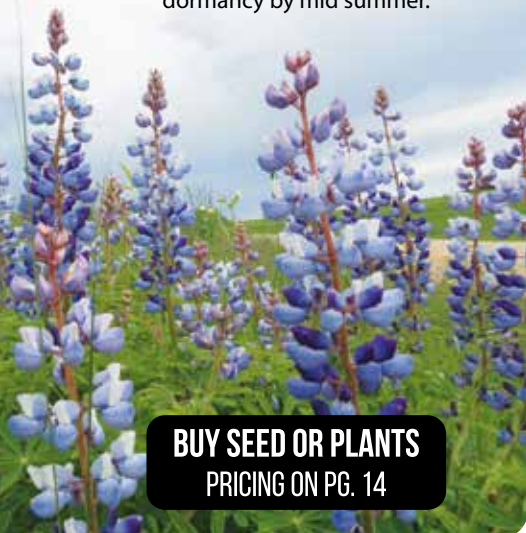

## ON THE COVER

### Wild Lupine (*Lupinus perennis*)

Rich amethyst, cream, and soft blue blossoms grace this distinguished plant.

Attractive, palm-shaped leaves are varying shades of green. Wild Lupine is the sole host plant for the endangered Karner Blue butterfly. It will transition to dormancy by mid summer.

**BUY SEED OR PLANTS**  
PRICING ON PG. 14

## WHY NATIVES?

Native plants have survived and adapted for centuries in the wilds of North America.

### Resilient. Beautiful. Beneficial.

Natives are the foundation to a healthy ecosystem and vital for wildlife. With every plant, you provide much needed food and habitat for diminishing pollinator and bird species.

RESTORE HABITAT

FILTER WATER

CLEAN AIR

BUILD SOIL

## WHY US?

Prairie Moon offers the largest native plant collection available for retail sales in the US. We provide over 700 North American species. Since 1982, our seeds and plants have been used by national parks, local municipalities, teachers, farmers, and backyard gardeners across the country.

When you buy from Prairie Moon, you know you are getting authentic, wild-type native plants, not cultivated varieties bred by the horticultural industry.

# OUR PRODUCTS

## SEEDS

### BEST VALUE, PATIENCE REQUIRED

We offer seeds from over 700 wild-type native species. One big advantage of using seed is affordability, especially when planting larger areas.

## DORMANT ROOTS

### MATURE PLANTS, WIDE SELECTION

Certain plants transplant more successfully when they are dormant. Most roots are 1-2 years old; we dig from outdoor garden beds and ship April-May.

## POTTED PLANTS

### FAST TO ESTABLISH, A GREAT VALUE

Our greenhouse-grown plants come in 3-packs (2.5" x 3.5"), or Trays (38 or 50 plants: 2" x 5"). Plants ship when they are well-rooted, late April to early June.

**FREE SHIPPING** ON \$100+ SEED ORDERS

**BEST SELLER** MIX & MATCH TRAYS PG. 6-9

## UNDERSTORY PATCH

**\$119 • 18 PLANTS**

Woodland diversity is declining! Do your part to re-create these ecosystems in your shady spaces. Grab this garden kit to provide habitat for beneficial insects and pollinators.

Learn about "Soft Landings", pg. 30

**NEW!**

## HOW TO ORDER:

**ORDER SECURELY ONLINE:** [prairiemoon.com](http://prairiemoon.com)  
**ORDER BY PHONE:** 866-417-8156 • Mon-Fri • 7am-5pm CST

Our Sales Team and secure website provide expert advice and up-to-date inventory.

# POLLINATOR GARDENS

GARDENS CURATED TO SUPPORT ALL POLLINATORS, ALL SEASONS

## POLLINATOR PATCH

wet 🌧️🌧️🌧️ dry | sun ☀️

This kit is a smaller version of our best-selling Pollinator Gardens. The Pollinator Patch is perfect for a new native gardener or those wanting an easy-to-establish classic prairie sampler. These plants will provide a succession of blooms, spring through fall, and will support pollinators all year long.

\$119

18 PLANTS • 6 SPECIES  
Covers 40-50 sq ft

## POLLINATOR GARDEN

wet 🌧️🌧️🌧️ dry | sun ☀️

Bring in the bees, butterflies, and birds with our most popular garden kit! This selection of plants provides a continuation of blooms to support native insects throughout the seasons. Creating habitat means food and shelter for our imperiled pollinators.

\$149

38 PLANTS • 14 SPECIES  
Covers 75-100 sq ft

## COLOSSAL POLLINATOR GARDEN

wet 🌧️🌧️🌧️ dry | sun ☀️

More plants means more pollinators! If you have the space, be a hero and plant this garden to support a herculean amount of wildlife.

\$189

50 PLANTS • 12 SPECIES  
Covers 120-150 sq ft

# MIX & MATCH TRAYS

# SINGLE SPECIES TRAYS

38 OR 50 PLANTS • 1 SPECIES

## THE MOST BANG FOR YOUR BUCK!

Single Species Trays are perfect for filling in large areas, whether you are adding more color to your prairie or creating beautiful landscaping around your home. Trays ship late April to early June. Search "tray" at [prairiemoon.com](http://prairiemoon.com) for all available species in 38 or 50 plant trays.

### 38 PLANT TRAY

**\$119** 38 plant tray  
Cells are 2" wide x 5" deep, perfect for deep-rooted natives.

### 50 PLANT TRAY

**\$139-\$179** 50 plant tray  
Cells are 2" wide x 5" deep, perfect for deep-rooted natives.

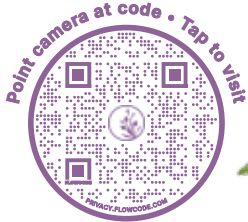

## ORDER EARLY!

Potted trays often sell out before spring shipping.

[prairiemoon.com/trays](http://prairiemoon.com/trays)

# POLLINATOR POWER PACKS

9 PLANTS • 3 SPECIES

**A POP OF COLOR EACH SEASON!** Ideal for bridging seasonal gaps in your garden. Choose from spring, summer, or fall bloomers. 2.5" x 3.5" pots are shipped in secure, recyclable cardboard inserts. **More Power Packs available at [prairiemoon.com/power-packs](http://prairiemoon.com/power-packs)**

## \$63 SPRING POWER PACK

wet ☁️💧💧💧 dry  
sun ☀️🌞

- 3 Golden Alexanders:** Host plant for Black Swallowtails. Pollinated by short-tongued bees.
- 3 Jacob's Ladder:** Pollinator favorite! Attracts bees, butterflies, moths, and hummingbirds.
- 3 Prairie Smoke:** A unique wildflower with wispy seed heads pollinated by bumble bees.

GOLDEN ALEXANDERS

JACOB'S LADDER

PRAIRIE SMOKE

## \$63 SUMMER POWER PACK

wet ☁️💧💧💧 dry  
sun ☀️🌞

- 3 Anise Hyssop:** Pollinator magnet! Attracts native bees and butterflies. Deer resistant.
- 3 Wild Petunia:** Appeals to long-tongued bees like leaf-cutters. A great ground cover.
- 3 Butterfly Weed:** Host plant for the Monarch butterfly. Attracts many other pollinators as well.

ANISE HYSOP

WILD PETUNIA

BUTTERFLY WEED

## \$63 FALL POWER PACK

wet ☁️💧💧💧 dry  
sun ☀️🌞

- 3 Smooth Blue Aster:** A favorite of many native bees and butterflies. A non-aggressive Aster.
- 3 Showy Goldenrod:** Pollinators rely on this critical late-season plant with abundant nectar.
- 3 Blue Sage:** Vivid blue blooms attract many long-tongued bees, especially bumblebees.

POLLINATOR POWER PACKS

# STARTING FROM SEED

The seeds of many native plants have dormancy mechanisms that prevent them from germinating before killing frosts or in times of drought. In the wild, seeds lie dormant until the proper conditions for growth occur. In cultivation, the successful gardener must become familiar with several simple pre-sowing seed treatment methods to stimulate quicker, more consistent germination.

Our seed germination codes were developed to help you successfully grow the seed we sell.

Seed should be stored in a cool, dry place or an airtight container under refrigeration (33–40°F) until you are ready to plant or begin pre-sowing treatment.

**A** No pre-treatment necessary. Seeds germinate after sowing in a warm location.

**B** Hot water treatment: Bring water to a boil; remove from heat. Pour over seed and allow the seed to soak for 24 hours at room temp prior to planting or starting artificial treatment.

**C/#** Seeds germinate after sitting out over winter or after a period of cold, moist stratification. Sow seeds outdoors in the fall to over-winter naturally and see germination the following spring, or artificially stratify seeds for the number of days in the parentheses. For more detailed instructions on artificial stratification, go to [prairiemoon.com](http://prairiemoon.com) and type GERMINATION into the search bar.

**D** Seeds are very small or need light to naturally break dormancy and germinate. Surface sow.

**E** In order to germinate, seeds need a warm, moist period (summer) followed by a cold, moist period (winter). Sow seeds outdoors in spring and expect germination the following spring, one full year later. To artificially mimic this stratification process, mix seeds with damp sand, place in a labeled, sealed plastic bag and store in warm (about 80°F) location for 60–90 days. Then place in refrigerator (33–38°F) for 60–90 days before sowing.

**F** Seeds have double dormancy and need a cold, moist period (winter) followed by a warm, moist period (summer) followed by a 2nd cold, moist period. Sow seeds outdoors in the fall and expect germination after 2 years. To artificially mimic this stratification process, start by following instructions for code C for 60–90 days, then store a in warm (70 to 80°F) place for 60–90 days, followed by a 2nd cold, moist period for 60–90 days.

**G** Seeds germinate most successfully in cool soil. Sow seeds in late fall (after hard frost) or early spring.

**H** Seeds need scarification: To scarify, lightly rub between two sheets of sandpaper before artificial stratification.

**I** Legume: Rhizobium Inoculum may be added. Most legume species harbor beneficial bacteria called rhizobia on their roots. Genus-specific strains of this bacterium called inoculum can aid in the fixation of atmospheric nitrogen and improve long-term health of native plant communities. Inoculum is naturally-occurring in most soils and additional amendment is usually not needed. However, it may be necessary in low fertility soils. Genus-specific strains are available at [prairiemoon.com/inoculum](http://prairiemoon.com/inoculum)

## INOCULUM FOR LEGUMES

Choose from 19 different rhizobial inoculum strains. [prairiemoon.com/inoculum](http://prairiemoon.com/inoculum) **SHIPS FREE!**

Inoculates up to 1 lb of seed.....\$6.00

**K** Hemiparasitic species which needs a host plant. Good hosts for many parasitic species include low-growing grasses and sedges.

**L** Plant fresh seed or keep moist. Refrigerate until planting or starting other treatment.

**M** Best planted outdoors in the fall.

**?** Not sure. Your input would be of interest to us.

# SEED PACKET COLLECTIONS

\$21

Curated for easy establishment and tailored to suit your unique design choices. These are the ultimate mini-mixes for themed garden sites between 20 and 50 square feet. Species in each collection are selected for gardeners at any skill level. **MAKES A GREAT GIFT!**

## 1 COLLECTION = 6 PACKETS OF SEED

### BEGINNER'S COLLECTION

New to natives? We've got you covered! The popular natives in the Beginner's Seed Packet Collection are easy to germinate and tend to once established. In addition, these plants provide an abundance of nectar, pollen, and habitat for imperiled pollinators.

Covers approximately 30-40 sq. ft.  
Includes 1 seed packet of each species:  
Purple Prairie Clover, Purple Coneflower, Wild Bergamot, Hairy Mountain Mint, Black-eyed Susan, & Smooth Blue Aster

\$21

\$21

### BOULEVARD COLLECTION

Whether you call it a boulevard, hellstrip, tree lawn, or road verge - the little patch of tired, dry soil between the sidewalk and street can be problematic. The natives in this Boulevard Collection will convert that barren area into a beautiful pollinator oasis!

Covers approximately 20-25 sq. ft.  
Includes 1 seed packet of each species:  
Side-oats Grama, Lance-leaf Coreopsis, Wild Lupine, Spotted Bee Balm, Aromatic Aster, & Hoary Vervain

\$21

### DEER RESISTANT COLLECTION

Deer may be neat to see in the wild, but they are not so welcome when they eat our gardens! Although deer may consume any plant, these species have rough-textured foliage, prickly leaves, spiny stems, or strong scents - all things deer tend to avoid.

Covers approximately 20-25 sq. ft.  
Includes 1 seed packet of each species:  
Anise Hyssop, Rattlesnake Master, Wild Bergamot, Stiff Goldenrod, Hairy Mountain Mint, & Compass Plant

## VIEW ALL 8 COLLECTIONS

Scan the code or search "collections" at [prairiemoon.com](http://prairiemoon.com)

### Starting Seeds

In this manual, the author covers the fundamentals of seed selection, soil preparation, proper light and moisture, helpful tools, creating a schedule, successful transplanting, troubleshooting tips, and a list of resources. This book is an excellent and affordable how-to guide for any gardener. **SHIPS FREE!**

# MILKWEED

PROVIDE A HABITAT  
FOR POLLINATORS

"When native plants disappear,  
the insects disappear,  
impoverishing the food  
source for birds and  
other animals."

- Doug Tallamy, Author  
Bringing Nature Home

**Poke Milkweed**  
*Asclepias exaltata*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  	WET W/M MED M/D DRY	5'	Jun-Jul	2-3'	4-7

This plant thrives in sun-dappled woodlands. The bicolored flowers droop elegantly on slender stalks, with green petals forming a backplash for white blooms. A host for Monarchs and Cynia Moths.

<b>SEED:</b> (30 seeds/pkt)	GERM CODE: C(30)
packet	\$3.00

**PLANTS:** 3-pack potted: \$24

**Spider Milkweed**  
*Asclepias viridis*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  	WET W/M MED M/D DRY	1'	May-Jun	2-3'	5-9

This plant is among the very first Milkweeds to bloom, offering a place for the first wave of northward migrating Monarchs to lay their eggs.

<b>SEED:</b> (30 seeds/pkt • 3,400/oz.)	GERM CODE: C(30)
packet	1/8 oz 1/4 oz 1/2 oz 1 oz

# BIRDS

Native plants are vital to birds. They attract a multitude of insects that birds need to feed their young. They provide nutritious seeds, fruit, and nectar. Natives also serve as safe nesting sites and perches.

Check out our Bird Bonanza Seed Mix, pg. 42

TREE

Downy Serviceberry

Amelanchier arborea

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
		25'	Apr-May	3-6'	4-9
FULL PART SHD	WET W/M MED M/D DRY				

Among the first trees to bloom in the spring, erupting in lacey white flowers. Young leaves have fuzzy undersides. Produces plentiful, reddish-purple berries in late summer. Foliage turns a coppery or burgundy color in the fall. An ecological interactions haven, supporting bug and bird populations alike, since most inland avians feed their hatchlings insects.

**PLANTS:** bare root: \$12 ea. Age: 1 year Size: 12"

NEW!

Tall Ironweed

Vernonia gigantea

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
		5'	Aug-Oct	2-3'	5-9
FULL PART SHD	WET W/M MED M/D DRY				

This late bloomer has fuschia flowers that produce a plethora of seed. A myriad of moths use this as a host plant, attracting hungry insectovorous birds.

**SEED:** (400 seeds/pkt • 23,000/oz.) GERM CODE: C(60)

# PRAIRIE CLASSICS

## FOR DRIER SOIL

Dry soil can be challenging, but you may be surprised at how many native plants naturally thrive in quick-draining sites with ample sand, rock, or gravel.

Large-flowered Beardtongue  
*Penstemon grandiflorus*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	2'	May-Jun	8-12"	3-8

Blossoms are often 2" long! Balance the relatively short bloom period by planting among other species, allowing the silvery leaves to shine.

SEED:	(300 seeds/pkt • 13,000/oz.)	GERM CODE:	C(30) • G	
packet	1/8 oz	1/4 oz	1/2 oz	1 oz
\$3.00	\$3.50	\$4.00	\$5.20	\$8.00

PLANTS: bare root: \$8 ea.

Hoary Vervain  
*Verbena stricta*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	2'	Jun-Sep	10-12"	3-8

Hoary Vervain's seeds are a staple for many birds that depend on this widely-distributed plant. It is a larval host for the Common Buckeye Butterfly.

SEED:	(750 seeds/pkt • 25,000/oz.)	GERM CODE:	C(60) • D	
packet	1/8 oz	1/4 oz	1/2 oz	1 oz
\$3.00	\$3.50	\$4.00	\$5.20	\$8.00

PLANTS: Potted Tray: from \$119 pg. 6-10

Western Sunflower  
*Helianthus occidentalis*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	3'	Jul-Sep	10-12"	3-9

Basal leaves form a rosette structure and the stem of the plant shoots up from the middle of it. It does well in the sandiest of soils and is found in upland prairies.

SEED:	(100 seeds/pkt • 14,000/oz.)	GERM CODE:	C(30)
packet	1/8 oz		
\$3.00	\$11.25		

PLANTS: bare root: 1-2 \$6 ea. 3+ \$5 ea.

Round-headed Bush Clover  
*Lespedeza capitata*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	4'	Aug-Sep	1-2'	3-9

Lime green buds crowd together and open to reveal tiny white blooms with magenta accents. Sturdy stems keep their form and showcase umber fall color.

SEED:	(200 seeds/pkt • 9,500/oz.)	GERM CODE:	C(10) • I • J	
packet	1/8 oz	1/4 oz	1/2 oz	1 oz
\$3.00	\$3.50	\$4.00	\$6.50	\$10.00

PLANTS: 3-pack potted: \$21

Spotted Bee Balm  
*Monarda punctata*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	2'	Jul-Sep	8-12"	3-9

Also called Dotted Horsemint. An eccentric beauty in form and color with complex blossoms, very different from other Monarda (pg. 15 & 20)

SEED:	(500 seeds/pkt • 70,000/oz.)	GERM CODE:	A • D	
packet	1/8 oz	1/4 oz	1/2 oz	1 oz
\$3.00	\$6.25	\$10.00	\$16.25	\$25.00

PLANTS: bare root: \$7 ea. • Potted Tray: from \$119 pg. 6-10

Prairie Sage  
*Artemisia ludoviciana*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	3'	Jul-Sep	1-2'	3-7

Prairie Sage can form dense colonies that give a silver-green accent to large plantings. Propagation by rhizome cuttings in spring is easy.

SEED:	(1,000 seeds/pkt • 275,000/oz.)	GERM CODE:	C(30) • D	
packet	1/8 oz	1/4 oz	1/2 oz	1 oz
\$3.00	\$11.25	\$17.50	\$30.00	\$50.00

PLANTS: 3-pack potted: \$21 • Potted Tray: from \$119 pg. 6-10

Lance-leaf Coreopsis  
*Coreopsis lanceolata*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	2'	May-Aug	10-16"	3-9

A classic, easy-to-grow prairie wildflower. This Coreopsis is drought tolerant, suited for sunny, hot sites or landscapes with dry, sandy, or poor soil.

SEED:	(250 seeds/pkt • 14,000/oz.)	GERM CODE:	C(30)
packet	1/2 oz	1 oz	1 lb
\$3.00	\$3.50	\$4.00	\$60.00

PLANTS: 3-pack potted: \$21 • Potted Tray: from \$119 pg. 6-10

Bush's Poppy Mallow  
*Callirhoe bushii*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
  FULL PART SHD	 WET W/M MED M/D DRY	2'	Jun-Aug	1-2'	5-8

Also called Wine Cups for their color and shape; a real stand-out in any planting. It spreads out rather than up and has a long bloom time.

SEED:	(30 seeds/pkt • 4,000/oz.)	GERM CODE:	B • C(30)	
packet	1/8 oz	1/4 oz	1/2 oz	1 oz
\$3.00	\$6.25	\$10.00	\$16.25	\$25.00

CREATE SOFT LANDINGS

Add native plants under keystone native trees (pg. 40) to create an environment that supports life cycles of countless insects. Many lay their eggs in the shelter of tree limbs; the young caterpillars and larvae eat their fill in the boughs - then rappel to the ground to pupate. A large percentage of these pupae overwinter in the leaf litter, plant debris, and soil.

Providing permanent plantings from tree trunk to dripline makes a "Soft Landing" for these insects to drop into. Leave the leaves to improve soil structure, remove thick mulch and landscape fabrics to allow the tree to respire, and do not mow the understory garden. Simply sit back and enjoy the complex ecosystem on your property!

**Maidenhair Fern**  
*Adiantum pedatum*

SUN	SOIL MOISTURE	HT	SPACING	ZONES
 	    	2'	10-12"	2-8
FULL PART SHD				

Highly recommended for home landscaping! This unique fern has black, wiry stems and delicate fronds that reach a foot across and curve into an appealing semi-circle. They are easy to grow in a woodland garden. If the site has consistently moist soil, this Fern can spread by its creeping rhizomes. For a pop of color, pair with Wild Geranium (pg. 30).

**PLANTS:** bare root: 1-2 **\$7 ea.** 3+ **\$6 ea.**

**Lady Fern**  
*Athyrium filix-femina*

SUN	SOIL MOISTURE	HT	SPACING	ZONES
 	    	1'	6-12"	3-8
FULL PART SHD				

Spreading slowly but steadily by rhizomes, this is a classic for any woodland garden. Deer and rabbits don't usually bother native ferns. Early-spring division is a common propagation method for a quicker spread. While typically found in full to part shade in drier soils than most ferns, Lady Fern is also tolerant of full sun if the site can be kept moist.

**PLANTS:** bare root: 1-2 **\$7 ea.** 3+ **\$6 ea.**

# FIREFLIES: AT RISK

Whether you call them fireflies or lightning bugs, over 150 different species of these mystical beetles make their home in North America - and every single one of them is declining - threatened by several key factors: habitat loss/ degradation, climate change, insecticides, and light pollution. Here are things you can do to assist these whimsical creatures:

**1. Create a Space** – Fireflies thrive in secluded, moist, organically rich environments. Encourage them to stay at your place by leaving a small woodpile or felled tree in the shade to decompose. Plant trees native to your area. Set aside a portion of land for a little bit of wilderness; allow a diverse mixture of grasses and flowers to grow taller than the manicured lawn. Most female fireflies send their signals from perches, blinking like little lighthouse beacons.

**2. Don't Use Insecticides** – need we say more?

**3. Turn Off the Lights** – light pollution is easy to fix and instantly reversible. Keep outdoor lights to a minimum to allow lightning bugs optimal communications with each other. Many species of firefly use specific bioluminescent signals to find their mates. Artificial lights may distract them from their mission and certainly interferes with fervent messages. No love language? No new lightning bugs.

**4. Talk to the Neighbors** – the efforts you make on your property are important - but fireflies are not limited to a single plot. Get friendly with your neighbors and encourage their involvement. Together, we can bring these nostalgic little beetles back from the brink and enjoy their dazzling performances again!

**Sweet Joe Pye Weed**  
*Eutrochium purpureum*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
 	    	7'	Jul-Sep	3-4'	3-8
FULL PART SHD					

A butterfly favorite, it is easy to grow and its faintly vanilla scented flowers are long-lasting and irresistible for Monarchs, Swallowtails and many other butterflies.

**SEED:** (400 seeds/pkt • 60,000/oz.) GERM CODE: C(30) • G

FULL PART SHD					

One of the first plants to provide nectar for hummingbirds. It is hardy and versatile; growing in clay, under pines, or beneath walnut trees.

**SEED:** (250 seeds/pkt • 25,000/oz.) GERM CODE: C(60) • M  
packet 1/8 oz 1/4 oz 1/2 oz 1 oz  
**\$3.00 \$6.25 \$10.00 \$16.25 \$25.00**

**PLANTS:** 3-pack potted: **\$21** • bare root: **\$8 ea.**

**NEW!**

## UNDERSTORY COLLECTION

Add color to your shady spots! These bright blooms sustain pollinators from April until September. Starting woodland perennials from seed can be complex and lengthy. These natives have straight-forward pre-treatment needs that are also tough once established.

**Covers approximately 10-15 sq. ft. Includes 1 seed packet of each species:** Columbine, Wild Geranium, Hairy Beardtongue, Jacob's Ladder, Zig Zag Goldenrod, & Yellow Pimpernel

**\$21**

KEYSTONE SHRUBS & TREES, LIKE OAKS, ARE CRITICAL FOR SUPPORTING FOOD WEBS. SEE PG. 40 OR SEARCH "KEYSTONE" AT PRAIRIEMOON.COM

An adaptable tree, growing tall or spreading wide depending on the conditions it's in. Juvenile trees often have dark bark that curls like birch bark. The root system is wider and more shallow than most Oaks, allowing it to tolerate temporary flooding, compacted soil, and roadside salt. Requires acidified soil to maintain good health. A haven for butterflies, skippers, and moths.

PLANT  
EARLY SPRING!

# ECO-GRASS

Early spring is a great time to plant Eco-Grass, when it has the advantage of early-season soil moisture.

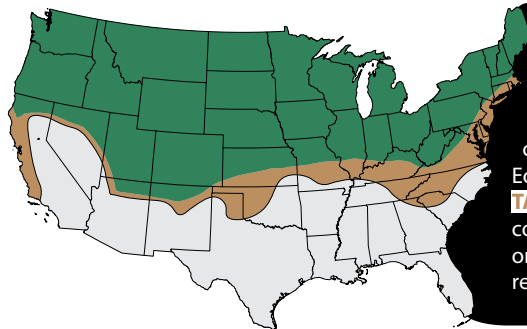

This versatile, fine-textured fescue blend establishes quickly, growing into a flowing carpet that can go unmowed - or be mowed.

Eco-Grass grows in most soil conditions, thriving in all but the shadiest and wettest settings.

The relatively deep root systems (4-9") enhance drought resistance by reducing water loss as they seek out deeper water reserves. Eco-Grass also yields big savings as a lawn alternative by eliminating or reducing the need for pesticides, fertilizers and frequent watering or mowing.

When Eco-Grass reaches about 8", it begins to form seed heads and tends to flop over, which can add an attractive naturalistic flow to landscape highlights. Once established, it is durable under moderate foot traffic. It resists invasion by filling in well, but will not encroach on neighboring plantings.

A cool-season grass blend, Eco-Grass is best planted on a prepared site from which competing species have been removed in early fall or early spring. Seeds can be hand-broadcast or distributed with a grass-seed spreader and should be lightly raked in and then watered well for the first two months, if needed. Depending upon conditions, germination can be expected in one to two weeks.

## RECOMMENDED PLANTING RANGE

Typical seasonal conditions in the **GREEN** areas are suited to growth of cool-season grasses like the fescues in Eco-Grass. Typical seasonal conditions in **TAN** areas are suited to growth of warm or cool season grasses but planting Eco-Grass on very dry, well-drained sites here is not recommended.

The cool-season nature of Eco-Grass shows in its bright-green luster in late autumn, followed by browning in dormancy and an early spring green-up.

SEED MIX ENHANCEMENTS

ADD MORE COLOR AND DIVERSITY TO YOUR NATIVE PLANTING

WET SOIL ENHANCEMENT		
Sun: ☀	Soil: Wet 🟡🟡🟡🟡🟡 Dry	
If you want to add flowers to your wetter seed mix or more diversity to an existing wet area, species like Cardinal Flower, Hibiscus, and Blazing Star are sure to please!		
6 Wildflowers • 216 seeds / sq ft • 2.03 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$26.00	\$31.00	\$104.00

SAVANNA ENHANCEMENT		
Sun: ☀	Soil: Wet ☹☹☹☹☹ Dry	
Add more diversity to a part-shade Seed Mix (pg. 44) or your existing semi-shaded area. Composed of quick-growing species like Hairy Wood Mint and Tall Bellflower (pictured above). 7 Wildflowers • 62 seeds / sq ft • .85 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$26.00	\$30.00	\$99.00

DRY SOIL ENHANCEMENT		
Sun: ☀️☀️	Soil: Wet 🌧️🌧️🌧️🌧️ Dry	
Want to add an extra splash of color to your dry site? Sow this enhancement with show-stoppers like Butterfly Weed, Sweet Everlasting, Prairie Phlox and many more.		
7 Wildflowers • 53 seeds / sq ft • 1.36 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$26.00	\$30.00	\$98.00

SHADY WOODLAND ENHANCEMENT		
Sun: ●	Soil: Wet ☹☹☹☹☹ Dry	
Diversify any shady area with this enhancement mix composed of woodland favorites,including Columbine and Solomon's Plume (pictured above) fall blooming Asters, and many more!		
10 Wildflowers • 55 seeds / sq ft • 2.28 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$33.00	\$44.00	\$169.00

MEDIUM SOIL ENHANCEMENT		
Sun: ☀☀	Soil: Wet 💧💧💧💧 Dry	
Add this enhancement to any seed mix for medium soils. Classic wildflowers like Pale Purple Coneflower, Black-eyed Susan (above) and several other species will provide even more color. 6 Wildflowers • 49 seeds / sq ft • 2.68 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$17.00	\$22.00	\$58.00

TALLGRASS EXPOSED CLAY SEED MIX		
Sun: ☀️	Soil: Wet 💧💧💧💧 Dry	
Compacted clay subsoils present challenging conditions for plant growth. The tough species in this mix like Yellow Coneflower, Purple Coneflower, Wild Bergamot, and Big Bluestem are up to the task.		
30 Wildflowers • 6 Grasses • 141 seeds / sq ft • 13.08 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$27.00	\$32.00	\$109.00

GRAND DIVERSITY SEED MIX		
Sun: ☀️🌙	Soil: Wet 💧💧💧💧 Dry	
High diversity and a heavy seeding rate make this a very strong, very showy mix. With 106 species there will be blooms spring through fall. Pictured: Butterfly Weed, Hoary Vervain, Wild Quinine, Yellow Coneflower and many, many more.		
91 Wildflowers • 14 Grasses • 204 seeds / sq ft • 13.84 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$51.00	\$81.00	\$352.00

INSECTOPIA SEED MIX		
Sun: ☀️🌙	Soil: Wet💧💧💧💧 Dry	
Great for anyone practicing integrated pest management. This mix will not only attract bees and butterflies, but also predatory insects that prey on garden pests. Design based on Xerces Society's <i>Farming with Native Beneficial Insects</i> : prairiemoon.com		
35 Wildflowers • 5 Grasses • 86 seeds / sq ft • 8.36 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$30.00	\$39.00	\$141.00

JUNGLE PRAIRIE SEED MIX		
Sun: ☀️🌙	Soil: Wet 🌧️🌧️🌧️🌧️ Dry	
<p>This seed mix includes the most robust and competitive prairie plants available. Enjoy a succession of colors and textures spring through fall as the planting matures. Some species pictured: Cup Plant, Brown-eyed Susan, and Stiff Goldenrod.</p> <p>37 Wildflowers • 5 Grasses • 105 seeds / sq ft • 10.83 lbs / acre</p>		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$28.00	\$34.00	\$119.00

SEPTIC SAFE SEED MIX		
Sun: ☀️🌙	Soil: Wet 💧💧💧💧 Dry	
Nature's original filtration device! Native plants have root systems that prevent soil erosion while absorbing excess moisture and *ahem* nutrients. These species are rugged; thriving in gravel above, and withstanding heat emitted from below. 22 Wildflowers - 7 Grasses - 177 seeds / sq ft - 12.96 lbs / acre		
500 sq.ft.	1,000 sq.ft.	1/8 acre
\$39.00	\$56.00	\$226.00
