2022 CULTURAL GUIDE

EXPERTS IN NATIVE PLANTS | SINCE 1982

USING OUR CULTURAL GUIDE

SOIL MOISTURE

WET

Soggy or marshy most of the year.

WET-MESIC

Excessively wet in winter, spring and after heavy rain but often dries in summer.

MESIC

Medium. Water soaks in with no run-off.

DRY-MESIC

Well drained. Water is removed from soil readily but not rapidly.

DRY

Excessively drained.

Approximate plant height (HT) is given with standard foot (') and inch (") abbreviations. Height is for mature full-grown plants in flower. Actual height will vary considerably due to competition, sun exposure, soil conditions, and weather. In young native plantings (less than 10 years) plant heights may be greater than in older plantings when competition reduces height.

COMMENTS

ANNUAL

Completes its life cycle during one season

BIENNIAL

Grows vegetatively during the first year, completes its life cycle during the second

CALCAREOUS

Needs alkaline soil with a pH of 7 to 8

ACIDIC

Needs acid soil with a pH of 4 to 6

HEMIPARASITIC

Requires a host plant species. See Germ Code K

SAND

Thrive particularly well in sandy or well-drained soils

COOL

Actively grows during the spring and fall when soil temperatures are cool

WARM

Actively grows during the summer when soil temperatures are warm

AGGRESSIVE

May not be suited for small landscape plantings

RHIZOMATOUS

Fast-spreading root system

NEW!

New species in seed or plant for 2022

Deer Resistant: (attn: deer may browse on any plant if food is scarce)

Pollinator Favorites

Bird Favorites

Highly recommended for home landscaping

Recommended for home landscaping, but potentially aggressive. Could overwhelm small landscapes

SUN EXPOSURE

FULL SUN

Plants require 6 or more hours of sun during the growing season.

PART SHADE

Plants need 3-6 hours of direct sun. Sun reaches ground level at woodland edges or through openings between trees. Prairie species will often grow in larger openings, with shade-tolerant species growing under trees.

SHADE

Plants require less than 3 hours of sunlight.
