SHORT & SHOWY SEED MIX

NEW!

This new seed mix is our response to a popular customer request: a low-profile collection of native plants with loads of colorful blooms. The majority of these species maintain a 2' growing height, haloed by airy seedheads that are less than 3' tall. These short-statured natives provide a host of pollinator benefits while appearing more tidy, in a 'wild-prairie' sort of way. A great 'gateway' mix that complies with more conventional landscaping and is nsey-neighbor-approved. Pick this seed mix to sow along driveways or sidewalks for beautiful blooms without compromising visibility.

POTTED PLANTS

FAST TO ESTABLISH, A GREAT VALUE

Our greenhouse-grown plants come in 3-packs (2.5" x 3.5") or Trays (38 or 50 plants: 2" x 5"). Plants ship when they are well-rooted, late April to early June.

BEST SELLER MIX & MATCH TRAYS PG. 6-7

DORMANT ROOTS

MATURE PLANTS, WIDE SELECTION

Certain plants transplant more successfully when they are dormant. Most roots are 1-2 years old; we dig from outdoor garden beds and ship April-May.

PRAIRIE MOON NURSERY®
NATIVE SEEDS & PLANTS FOR GARDENING AND RESTORATION

WHY CHOOSE NATIVE PLANTS?

Gardeners everywhere are becoming more aware of the benefits of native plants. The vast North American Prairie is now a small fraction of what it once was, with 99% plowed under or paved over. Each native planting - large or small - becomes a part of the collective effort to nurture and sustain the living landscape. Natives are the foundation to a healthy ecosystem and vital for wildlife. With every plant, you provide much needed food and habitat for diminishing pollinator and bird species. Native plants are also instrumental for cleaning the air, filtering water, and building soil.

FILTER WATER

RESTORE HABITAT

CLEAN AIR

BUILD SOIL

Whether it's a few square feet or several acres, we can all make a difference... hope grows in every backyard!

JOIN THE MOVEMENT. CHOOSE NATIVE PLANTS!

WHY CHOOSE US?

Prairie Moon offers the largest native plant collection available for retail sales in the US. We provide over 700 North American species. Since 1982, our seeds and plants have been used by national parks, local municipalities, teachers, farmers, and backyard gardeners across the country.

When you buy from Prairie Moon, you know you are getting authentic, wild-type native plants - not cultivated varieties bred by the horticultural industry.

POLLINATOR GARDENS

GARDENS CURATED TO SUPPORT ALL POLLINATORS, ALL SEASONS

POLLINATOR GARDEN

38 PLANTS • 12 SPECIES
Covers 75-100 sq ft

Our most popular kit! Transform a piece of your property into a beautiful, bustling oasis. These hand-picked natives will provide a succession of blooms throughout the growing season, attracting and sustaining a myriad of local pollinators and migrating fly-ins. Several larval host plants are included in this selection, including Butterfly Weed: expect to see Monarch butterflies and caterpillars in no time! Hummingbirds will hover around the Royal Catchfly and songbirds of all sorts will flock to collect the seed from the Orange and Purple Coneflowers in the fall.

\$159

wet ☹️☹️☹️ dry | sun ☀️

POLLINATOR PATCH

18 PLANTS • 6 SPECIES
Covers 40-50 sq ft

Support pollinators all year long with a smaller version of our Pollinator Garden kits. Perfect for a new native gardener or those wanting an easy-to-establish sampler.

\$119

wet ☹️☹️☹️ dry | sun ☀️

COLOSSAL POLLINATOR GARDEN

50 PLANTS • 12 SPECIES
Covers 120-150 sq ft

More plants means more pollinators! If you have the space, be a hero and plant this garden to support a herculean amount of wildlife. Our most cost efficient kit.

A POP OF COLOR EACH SEASON! Bridge the seasonal gaps in your garden. Choose from spring, summer, or fall bloomers. 2.5" x 3.5" pots are shipped in secure cardboard inserts.

SPRING POWER PACK

wet ☀️☀️☀️☀️ dry
sun ☀️☀️

3 GOLDEN ALEXANDERS
Host plant for Black Swallowtails. Pollinated by short-tongued bees.

3 JACOB'S LADDER
Pollinator favorite! Attracts bees, butterflies, moths, and hummingbirds.

3 PRAIRIE SMOKE
A unique wildflower with wispy seed heads pollinated by bumble bees.

SUMMER POWER PACK

wet ☀️☀️☀️☀️ dry
sun ☀️☀️

3 BUTTERFLY WEED
Host plant for the Monarch butterfly. Attracts many other pollinators as well.

3 WILD PETUNIA
Appeals to long-tongued bees like leaf-cutters. This plant is a great ground cover.

3 ANISE HYSOPP
A pollinator magnet! Attracts native bees & butterflies. Deer resistant.

FALL POWER PACK

wet ☀️☀️☀️☀️ dry
sun ☀️☀️

3 SMOOTH BLUE ASTER
A favorite of many native bees and butterflies. A non-aggressive Aster.

3 SHOWY GOLDENROD
Pollinators rely on this critical late-season plant with abundant nectar.

3 BLUE SAGE
Vivid blooms attract many long-tongued bees, especially bumblebees.

STARTING FROM SEED

The seeds of many native plants have dormancy mechanisms that protect them from germinating before killing frosts or in times of drought. In the wild, seeds lie dormant until the proper conditions for growth occur.

In cultivation, the successful gardener must become familiar with several simple pre-sowing seed treatment methods to stimulate quicker, more consistent germination.

Our seed germination codes were developed to help you successfully grow the seed we sell. Each of our 700+ species has been assigned a germination code(s) which can be found in this catalog, on our website, and directly on each seed packet.

GERMINATION CODES

A No pre-treatment necessary. Seeds germinate after sowing in a warm location.

B Hot water treatment: Bring water to a boil; remove from heat. Pour over seed and allow the seed to soak for 24 hours at room temp prior to planting or starting artificial stratification.

C Seeds germinate after experiencing a winter season or after a period of artificial cold, moist stratification. Sow seeds outdoors in the fall to over-winter naturally and see germination the following spring, or artificially stratify seeds for the number of days in the parentheses. For more detailed instructions on artificial stratification, go to prairiemoon.com and type GERMINATION into the search bar.

D Seeds are very small or need light to naturally break dormancy and germinate. Surface sow.

E Seeds need a warm, moist period (summer) followed by a cold, moist period (winter). Sow seeds outdoors in spring and expect germination the following spring, one full year later. To artificially mimic this stratification process, mix seeds with damp sand, place in a labeled, sealed plastic bag and store in warm (about 80°F) location for 60–90 days. Then place in the refrigerator (33–38°F) for another 60–90 days before sowing.

F Seeds have double dormancy and need a cold, moist period (winter) followed by a warm, moist period (summer) followed by a 2nd cold, moist period. Sow seeds outdoors in the fall and expect germination after 2 years. To artificially mimic this stratification process, follow instructions for code C for 60-90 days, then store a in warm (70 to 80°F) place for 60-90 days, followed by a 2nd cold, moist period for 60-90 days.

G Seeds germinate most successfully in cool soil. Sow seeds in late fall (after hard frost) or early spring.

H Seeds need scarification: To scarify, lightly rub the seed between two sheets of sandpaper before artificial stratification.

I Legume: Rhizobium Inoculum may be added. Most legume species harbor beneficial bacteria called rhizobia on their roots. Genus-specific strains of this bacterium called inoculum can aid in the fixation of atmospheric nitrogen and improve long-term health of native plant communities. Inoculum is naturally-occurring in most soils and additional amendment is usually not needed. However, it may be necessary in low fertility soils. Genus-specific strains are available at prairiemoon.com/inoculum

INOCULUM FOR LEGUMES

Choose from 8 different rhizobial inoculum strains. **SHIPS FREE!**
Inoculates up to 1 lb of seed.....\$6.00

J We remove the hulls from this species. If seed from other sources has the hull intact, scarification may be necessary.

K Hemiparasitic species which needs a host plant. Good hosts for many parasitic species include low-growing grasses and sedges.

L Plant fresh seed or keep moist. Refrigerate until planting or starting other treatment.

M Best planted outdoors in the fall.

? Not sure. Your input would be of interest to us.

C GERMINATION CODE C: NATURAL STRATIFICATION

OUTDOOR SOWING:

To naturally stratify seed, surface sow outdoors late fall through winter on a bare (weed-free), compact site and allow seed to overwinter. If you are new to perennial seed starting, this would be the preferred method.

C GERMINATION CODE C: ARTIFICIAL STRATIFICATION

SAND METHOD: SUITED FOR PLANTING IN ROWS

Place stratification sand into a bowl. We use a 1/3 cup fine sand to 1/8 oz seed ratio. Add water. We used 1 to 2 teaspoons of water per 1/3 cup of sand.

Mix only enough water to allow sand to form into a ball. Add your seed to the stratification sand and mix together. Our package label will indicate the suggested number of days for artificial stratification i.e. C (60) = 60 days of cold, moist conditions needed.

Refrigerate the seed mixture in a sealed plastic bag marked with start and finish dates. Check periodically so that the mixture does not dry out. If premature sprouting occurs, plant into containers and continue to grow them indoors until spring. Once cold, moist stratification is complete, sow the seed into rows outdoors when the threat of below-freezing temps has passed.

COFFEE FILTER METHOD: SUITED FOR CELLS OR CONTAINERS

Using your germination code, calculate the date to start cold, moist stratification. Rinse or complete a short soak. Pour into a coffee filter, paper towel, or fine screen to drain.

Arrange seed in a single layer and allow all excess water to drain off. Fold seed loosely into the coffee filter or paper towel to allow for weekly spot checks. The seed and paper should be damp but not wet.

Add a dry paper towel to your labeled resealable bag to help to maintain even moisture while pulling excessive moisture away. Do not allow the stratification medium to completely dry out or stay soggy. Place the sealed bag in your refrigerator (not freezer) and monitor weekly, or as needed, until it is time to remove for sowing. Replace coffee filter or paper towel often; repeat from step 1. Once seed has completed the recommended stratification period, or if excessive early sprouting occurs, plant immediately.

STARTING SEEDS

In this manual, the author covers the fundamentals of seed selection, soil preparation, proper light and moisture,

helpful tools, creating a schedule, successful transplanting, troubleshooting tips, and a list of resources. This book is an excellent and affordable how-to guide for any gardener. **SHIPS FREE!**

\$9

LEARN NATIVE PLANTS FLASH CARDS

These flash cards include a sampling of 155 plant species native to the Driftless Area of Wisconsin, Minnesota, Illinois and Iowa.

Each card has a plant photo on the front and includes growing conditions. The plant family, genus, and species are revealed on the back. **SHIPS FREE!**

\$29

STRATIFICATION SAND

We use fine sand as a medium to artificially stratify seed. Unlike other seed starting media, the uniform color and fine texture allows you to see your

seed. Use to stratify 1 oz of seed (slightly more or less depending on seed size). **SHIPS FREE!**

\$10

BIODEGRADABLE PLANT MARKERS

PACK OF 15 | PEN INCLUDED

Label your plants with these heavy-duty plant markers. Made with 80% biodegradable plant-based polyesters (a sugarcane by-product) and 20% biomass made from corn cobs. The material is formulated and produced in the United States. The degradation rate varies depending on your environment. Each pack includes a fine point nursery marker that is sunproof

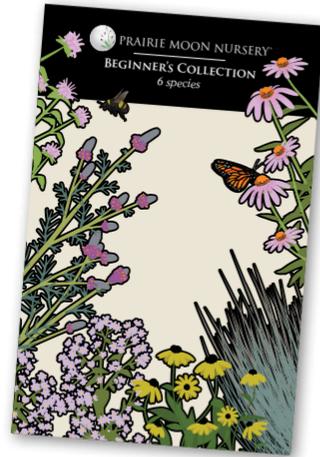

and waterproof for writing on plastic and wood. 9.5" tall with a 3" marking surface. **SHIPS FREE!**

\$36

SEED PACKET COLLECTIONS

Selected for easy establishment and tailored to suit your unique design choices. These are the ultimate mini-mixes for themed garden sites between 15 and 40 square feet. Species in each collection are approachable for gardeners at any skill level. **MAKES A GREAT GIFT!**

\$21

1 COLLECTION = 6 PACKETS OF SEED

BEGINNER'S COLLECTION

New to natives? We've got you covered! The popular natives in the Beginner's Seed Packet Collection are easy to germinate and care for once established. These plants also provide abundant nectar, pollen, and habitat for imperiled pollinators.

Covers approximately 30-40 sq. ft.
Includes 1 seed packet of each species:
Purple Prairie Clover, Purple Coneflower, Wild Bergamot, Black-eyed Susan, Smooth Blue Aster, & Little Bluestem..... \$21

RAIN GARDEN COLLECTION

Areas where water collects can be transformed into a sanctuary. This collection of plants absorbs water, filters runoff, and provides habitat for pollinators. The wildflowers in this collection range from 3' - 6' in height and can tolerate standing water.

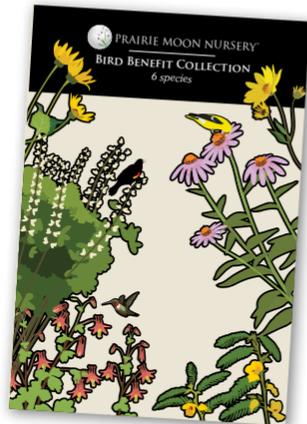

Covers approximately 15-20 sq. ft.
Includes 1 seed packet of each species:
Rose Milkweed, Joe Pye Weed, Sneezeweed, Cardinal Flower, Obedient Plant, & New England Aster \$21

LIVING FENCE COLLECTION

Create a privacy screen with these majestic, easy-to-grow natives. This towering collection thrives in light shade and showcases colorful summer flowers, bringing cheer and pollinators to a green woodland backdrop. Average plant height in the group is 6 feet.

Covers approximately 30-40 sq. ft.
Includes 1 seed packet of each species:
Hairy Wood Mint, Tall Bellflower, Sweet Joe Pye Weed, Wild Golden Glow, Early Figwort, & Culver's Root \$21

BIRD BENEFIT COLLECTION

Sustain birds by planting a living birdfeeder. Adult birds adore seeds from Coneflower, Sunflower, and Partridge Pea. They can perch in the safety of sturdy plants like Cup Plant or Wild Indigo. Columbine will be one of the first blooms to sustain Hummingbirds.

Covers approximately 30-40 sq. ft.
Includes 1 seed packet of each species:
Columbine, White Wild Indigo, Partridge Pea, Purple Coneflower, Showy Sunflower, & Cup Plant \$21

DEER RESISTANT COLLECTION

Deer populations have increased and are commonly observed browsing in gardens. Although deer may consume any plant, there are many they don't find palatable. This collection includes species they avoid - plants with rough, prickly, or aromatic foliage.

Covers approximately 20-25 sq. ft.
Includes 1 seed packet of each species:
Anise Hyssop, Rattlesnake Master, Wild Bergamot, Stiff Goldenrod, Hairy Mountain Mint, & Compass Plant \$21

BOULEVARD COLLECTION

Whether you call it a boulevard, hellstrip, tree lawn, or road verge - the little patch of tired, dry soil between the sidewalk and street can be problematic. The natives in this Boulevard Collection will convert that barren area into a beautiful pollinator oasis!

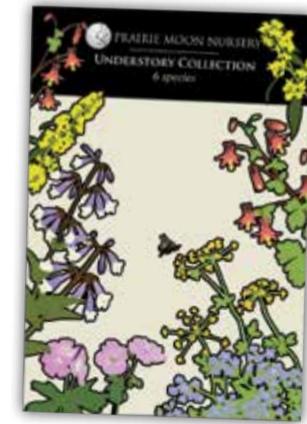

Covers approximately 20-25 sq. ft.
Includes 1 seed packet of each species:
Side-oats Grama, Lance-leaf Coreopsis, Sundial Lupine, Spotted Bee Balm, Aromatic Aster, & Hoary Vervain \$21

MILKWEED COLLECTION

Milkweeds are the ONLY host plants for the Monarch butterfly; the only place they lay their eggs and the sole food source for hungry caterpillars. Boost Monarch populations by planting Milkweed in every garden across the country!

*The sun & soil needs of each Milkweed in this Collection vary; they are not meant to be planted together.
Includes 1 seed packet of each species:
Poke Milkweed, Rose Milkweed, Common Milkweed, Butterfly Milkweed, Whorled Milkweed, & Spider Milkweed \$21

UNDERSTORY COLLECTION

Add color to your shady spots! These blooms sustain pollinators April - September. Starting woodland perennials from seed can be complex and lengthy. This selection has straight-forward pre-treatment needs and the plants are resilient once established.

Covers approximately 15-20 sq. ft.
Includes 1 seed packet of each species:
Columbine, Wild Geranium, Hairy Beardtongue, Jacob's Ladder, Zig Zag Goldenrod, & Yellow Pimpernel \$21

Host plant for the federally endangered Karner Blue

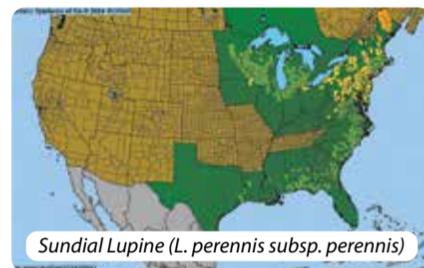

WHAT'S IN A NAME?

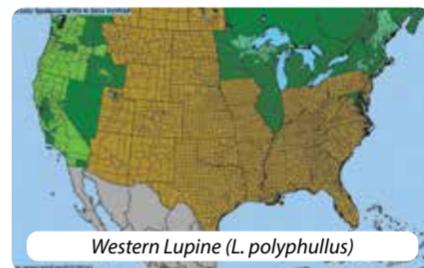

We have changed the common name of our Lupine – previously sold as “Wild Lupine.” We are clarifying which species we offer: SUNDIAL LUPINE is *Lupinus perennis subsp. perennis*. This exact species is historically native and used to be prolific around the eastern perimeter of the U.S. The confusion stems from the fact that other species are often called “Wild Lupine.” One particularly problematic species is *Lupinus polyphyllus*, or Western Lupine, which is native to the west coast but has been introduced in gardens across the country. Because it is a larger, showier plant and spreads rapidly, *L. polyphyllus* has infiltrated the seed market as “Wild Lupine” and incorrectly as “*Lupinus perennis*.” It has been proven to be very aggressive, especially in the Upper Midwest and Northeast regions. Beyond its ability to spread and overwinter, *L. polyphyllus* is upsetting the balance of local wildlife in the eastern half of the U.S. – most notably for the federally endangered Karner Blue Butterfly whose only larval host is Sundial Lupine. The Western Lupine is NOT a larval host for this beloved species, despite the marketing push; according to the National Park Service, the foliage is poisonous. Any Karner Blues that mistakenly lay their eggs on this plant have doomed their caterpillars. Sadly, *L. polyphyllus* readily hybridizes with Sundial Lupine; the resulting plants are also inhospitable.

Arnel, our Production Manager, checks the Sundial Lupine seed pods for ripeness.

Sundial Lupine (*L. perennis subsp. perennis*)

Western Lupine (*L. polyphyllus*)

HOST PLANTS

Host plants are essential for supporting the larval stage of insect pollinators. Butterflies and moths are some of the more iconic creatures that metamorphose, but they don't begin life as the stunning beauties we know and love - they are hungry little caterpillars hatched from eggs. These larvae are not always pretty, and they often get a bad rap for eating or "ruining" the plants that house them. The amazing relationship between host plants and the larva they support has evolved symbiotically; native plants recover after hosting their native pollinators. So if you see curling leaves, webbing, poop, holes, and gnaw marks, know that you, too, are hosting these remarkable transformations in your garden!

Host plant for the American Lady

Pearly Everlasting

Anaphalis margaritacea

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
FULL PART SHD	WET W/M MED M/D DRY	2'	Jun-Sep	1-3'	2-7

Soft, silvery green foliage produces pearlescent flowers with yellow to dark gold centers. This hardy and versatile plant plays well with others. Pair with Butterfly Weed for a stunning display in late spring.

MADE IN THE SHADE

FOR SHADED AREAS OR WOODLANDS

Jacob's Ladder
Polemonium reptans

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	1'	Apr-Jun	6-12"	3-8

Pastel blossoms decorate the entire mound in a short, but sweet, spring bloom. The leaf structure is arranged laterally on the stem, much like the rungs of a ladder. The leaves stay green all summer.

SEED: (100 seeds/pkt) GERM CODE: C(60)
packet: **\$3.00**

PLANTS: 3-pack potted: \$24

Poke Milkweed
Asclepias exaltata

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	5'	Jun-Jul	2-3'	4-7

Perfect for sun-dappled woodlands, its bicolored flowers droop elegantly with green and white blooms. Provides a source of food for many insects including Monarchs and Cynia Moths.

SEED: (30 seeds/pkt • 3,000/oz.) GERM CODE: C(30)
packet: **\$3.00**

PLANTS: 3-pack potted: \$24

Blue-stemmed Goldenrod
Solidago caesia

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	3'	Aug-Oct	2-3'	4-8

A well-behaved woodland Goldenrod. Attractive blue-tinted, arching stems will support loose clumps of yellow flowers that support bumblebees late in the season. Plant with Short's Aster for color contrast.

SEED: (500 seeds/pkt) GERM CODE: C(60) • D
packet **\$3.00**

PLANTS: 3-pack potted: \$21

Zig Zag Goldenrod
Solidago flexicaulis

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	3'	Aug-Oct	1-2'	3-8

Cheery yellow flowers meander along the upper stem in airy clusters. Named for the way the stem angles itself from one broad leaf to the next, creating a zig-zag effect. A critical food source for pollinators.

SEED: (100 seeds/pkt) GERM CODE: C(60) • D
packet: **\$3.00**

PLANTS: 3-pack potted: \$21 • bare root: \$8 ea.

Columbine
Aquilegia canadensis

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	Apr-Jun	10-17"	3-8

One of the first plants to provide nectar for hummingbirds. It is hardy and versatile; growing in clay, under pines, or beneath walnut trees.

SEED: (250 seeds/pkt • 25,000/oz.) GERM CODE: C(60) • M					
packet	1/8 oz	1/4 oz	1/2 oz	1 oz	
	\$3.00	\$6.25	\$10.00	\$16.25	\$25.00

PLANTS: 3-pack potted: \$21 • bare root: \$8 ea.

Virginia Bluebells
Mertensia virginica

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	Apr-May	1-2'	3-8

This spring ephemeral enjoys rich, well-drained soils and forms large colonies over time. The flowers gradually turn from pink to light blue as they mature.

SEED: (75 seeds/pkt • 9,700/oz.) GERM CODE: C(60) • M					
packet	1/8 oz				
	\$3.00	\$17.50			

PLANTS: bare root: \$10 ea.

Big-Leaved Aster
Eurybia macrophylla

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	1'	Aug-Oct	2-3'	3-7

Able to glean nutrition from the most depleted soil, this plant creates a lush groundcover in any shady location; the heart-shaped leaves are the main event.

SEED: (75 seeds/pkt • 45,000/oz.) GERM CODE: C(60)					
packet	1/8 oz	1/4 oz	1/2 oz	1 oz	
	\$3.00	\$12.50	\$20.00	\$35.00	\$60.00

PLANTS: 3-pack potted: \$21

Wild Garlic
Allium canadense

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	18"	May-Jul	4-8"	3-8

Crush the foliage to release that iconic smell. This plant will adapt to all but the wettest soil conditions. The light pink blossoms create an airy starburst effect.

SEED: (15 seeds/pkt • 560/oz.) GERM CODE: C(60)					
packet	1/8 oz	1/4 oz	1/2 oz	1 oz	
	\$3.00	\$3.50	\$4.50	\$6.50	\$10.00

PLANTS: bulbs: 1-2 \$5 ea. 3-11 \$4 ea. 12+ \$2.80 ea.

Wild Geranium
Geranium maculatum

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	1'	Apr-Jul	10-12"	3-8

Dainty, lilac-colored flowers bloom on slender stems, reaching up from deeply lobed, attractive foliage. This resilient plant tolerates most growing conditions and makes a bountiful groundcover.

SEED: (45 seeds/pkt) GERM CODE: C(60) • M					
packet					\$3.00

PLANTS: 3-pack potted: \$24 • bare root: 1-2 \$6 ea. 3+ \$5 ea.

Ostrich Fern
Matteuccia struthiopteris

SUN	SOIL MOISTURE	HT	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧💧 WET W/M MED M/D DRY	4'	18-24"	2-8

This fern is easy to grow in wet woodland locations and spreads slowly by rhizomes. In early spring, foragers seek the edible curled fronds, called "fiddleheads" which are prepared like asparagus. Ostrich Ferns are easily distinguishable from other ferns by their celery-like, U-shaped stem. Plant in your garden for its beautiful foliage and textural interest.

PLANTS: bare root: \$9 ea.

Lady Fern
Athyrium filix-femina

SUN	SOIL MOISTURE	HT	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	1'	6-12"	3-8

Spreading slowly but steadily by rhizomes, this is a classic for any woodland garden. Deer and rabbits don't usually bother native ferns. Early-spring division is a common propagation method for a quicker spread. While typically found in full to part shade in drier soils than most ferns, Lady Fern is also tolerant of full sun if the site can be kept moist.

PLANTS: bare root: 1-2 \$7 ea. 3+ \$6 ea.

3-PACKS SHIP JUNE

Yellow Pimpernel
Taenidia integerrima

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	3'	May-Jul	1-2'	4-8

The yellow umbel flowers sustain pollinators during the nectar lull between spring and summer. The foliage smells like celery when disturbed. Adapts to most site conditions.

SEED:	(90 seeds/pkt • 6,000/oz.)	GERM CODE:	C(60) • M
packet	1/8 oz	1/4 oz	1/2 oz
	\$3.00	\$8.50	\$12.75
		\$21.50	\$35.00

PLANTS: 3-pack potted: \$21

Virginia Waterleaf
Hydrophyllum virginianum

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	May-Jun	10-12"	4-9

This early bloomer is named for the light green "splashes" that mottle the emerging foliage. Native to deciduous woodlands. Can spread abundantly and may not be suitable for small landscapes.

SEED:	(50 seeds/pkt)	GERM CODE:	C(60)
packet:	\$3.00		

PLANTS: bare root: 1-2 \$6 ea. 3-11 \$5 ea. 12+ \$3.50 ea.

Maidenhair Fern
Adiantum pedatum

SUN	SOIL MOISTURE	HT	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	10-12"	2-8

Highly recommended for home landscaping! This unique fern has black, wiry stems and delicate fronds that reach a foot across and curve into an appealing semi-circle. They are easy to grow in a woodland garden. If the site has consistently moist soil, this Fern can spread by its creeping rhizomes. For a pop of color, pair with Wild Geranium (pg. 33).

PLANTS: bare root: 1-2 \$7 ea. 3-11 \$6 ea. 12+ \$4.20 ea.

Interrupted Fern
Osmunda claytoniana

SUN	SOIL MOISTURE	HT	SPACING	ZONES
☀️ FULL PART SHD	💧💧 WET W/M MED M/D DRY	3'	1-2'	3-8

Interrupted Fern prefers moist, rich, acidic soil typical of a healthy woodland but can adapt to drier soils and nearly full sun. On average this vase-shaped, broad-leaf fern is 2-3 feet but can reach 4 feet or more in consistently moist settings. The broad fronds are "interrupted" in the middle by spore-bearing leaflets which lends to the common name.

PLANTS: bare root: 1-2 \$10 ea. 3+ \$9 ea.

Common Wood Sedge
Carex blanda

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	May-Jun	2-3'	3-9

A nice ever-green sedge that is extremely versatile. Plant in sun or shade, moist or semi-dry conditions. A low-mounded profile makes it great for landscaping.

SEED:	(100 seeds/pkt • 13,500/oz.)	GERM CODE:	C(60)
packet	1/8 oz	1/4 oz	1/2 oz
	\$3.00	\$7.50	\$12.00
		\$19.50	\$30.00

PLANTS: bare root: \$7 ea.

Long-beaked Sedge
Carex sprengei

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	May-Jul	10-12"	3-5

Great for shade landscaping! This sedge maintains its upright posture and thrives in most soils. The seeds in fall are a food source for songbirds.

SEED:	(150 seeds/pkt • 10,000/oz.)	GERM CODE:	C(60)
packet	1/8 oz	1/4 oz	1/2 oz
	\$3.00	\$7.50	\$12.00
		\$19.50	\$30.00

PLANTS: 3-pack potted: \$21

Sweet Joe Pye Weed
Eutrochium purpureum

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	7'	Jul-Sep	3-4'	3-8

A butterfly favorite, it is easy to grow and its faintly vanilla-scented flowers are long-lasting and irresistible for Monarchs, Swallowtails, and many other butterflies.

SEED:	(400 seeds/pkt • 60,000/oz.)	GERM CODE:	C(30) • G
packet	1/8 oz	1/4 oz	1/2 oz
	\$3.00	\$6.25	\$10.00
		\$16.25	\$25.00

PLANTS: 3-pack potted: \$21 • potted tray: from \$129 pg. 6-8

Wild Ginger
Asarum canadense

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	6"	Apr-Jun	6-12"	3-7

This low-growing ground cover keeps its foliage through the seasons. An attractive red flower appears under the plant early spring. It enjoys moist, acidic soil.

SEED:	(40 seeds/pkt • 4,800/oz.)	GERM CODE:	L • E
packet	1/8 oz	1/4 oz	
	\$3.00	\$12.50	\$20.00

PLANTS: bare root: 1-2 \$7 ea. 3-11 \$6 ea. 12+ \$4.20 ea.

PRAIRIE GRASSES

Native grasses provide support for wildflowers, keeping their blooms upright while highlighting them with contrasting forms and colors. Grasses also provide year-round cover and food for wildlife. Many grass species establish easily from seed.

Indian Grass
Sorghastrum nutans

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	6'	Aug-Sep	2-3'	3-9

One of the first warm season grasses to form rich clusters of bronze colored seed. Golden stems and large seed heads provide food to birds come fall.

SEED: (500 seeds/pkt • 11,000/oz.) GERM CODE: A
packet 1 oz 1 lb
\$3.00 \$3.50 \$16.00

Eragrostis spectabilis

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧 WET W/M MED M/D DRY	2'	Jul-Aug	1-2'	3-9

When the florets bloom they give an overall purple haze to the landscape. This tough ornamental grass is a stunning addition to any dry area.

SEED: (500 seeds/pkt • 280,000/oz.) GERM CODE: A - D
packet 1/8 oz 1/4 oz 1/2 oz 1 oz
\$3.00 \$7.50 \$12.00 \$19.50 \$30.00

PLANTS: 3-pack potted: \$21 • potted tray: from \$129 pg. 6-8

Prairie Dropseed
Sporobolus heterolepis

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧💧 WET W/M MED M/D DRY	2'	Aug-Oct	2-3'	3-9

A LANDSCAPING MUST-HAVE! A wonderful bunch-forming native grass. Takes on a nice golden hue throughout fall and winter. Birds eat the seeds.

SEED: (300 seeds/pkt • 14,000/oz.) GERM CODE: A
packet 1/8 oz 1/4 oz 1/2 oz 1 oz
\$3.00 \$4.00 \$6.00 \$9.75 \$15.00

PLANTS: 3-pack potted: \$21 • potted tray: from \$129 pg. 6-8

Side-oats Grama
Bouteloua curtipendula

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
☀️ FULL PART SHD	💧💧 WET W/M MED M/D DRY	2'	Aug-Sep	10-24"	3-9

Offers a distinctive bloom, with tiny red and purple flowers hanging uniformly from one side of the stem. A food source and larval host for several Skippers.

SEED: (300 seeds/pkt • 4,000/oz.) GERM CODE: A
packet 1 oz 1 lb
\$3.00 \$3.50 \$26.00

PLANTS: 3-pack potted: \$18 • potted tray: from \$129 Pg. 6-8

SHORTGRASS SAMPLER PACK

9 PLANTS • 3 SPECIES

Little Bluestem (3) Side-oats Grama (3) Prairie Dropseed (3)

Showy in their own right, grasses provide key structure in many ecosystems. These species maintain good form and require little attention once established.

PRAIRIE GRASSES

MORE ONLINE! prairiemoon.com/prairie-grasses

**PLANT
EARLY SPRING!**

ECO-GRASS

Early spring is a great time to plant Eco-Grass, when it has the advantage of early-season soil moisture.

This versatile, fine-textured fescue blend establishes quickly, growing into a flowing carpet that can go unmowed - or be mowed.

Eco-Grass grows in most soil conditions, thriving in all but the shadiest and wettest settings.

The relatively deep root systems (4-9") enhance drought resistance by reducing water loss as they seek out deeper water reserves. Eco-Grass also yields big savings as a lawn alternative by eliminating or reducing the need for pesticides, fertilizers and frequent watering or mowing.

When Eco-Grass reaches about 8", it begins to form seed heads and tends to flop over, which can add an attractive naturalistic flow to landscape highlights. Once established, it is durable under moderate foot traffic. It resists invasion by filling in well, but will not encroach on neighboring plantings.

A cool-season grass blend, Eco-Grass is best planted on a prepared site from which competing species have been removed in early fall or early spring. Seeds can be hand-broadcast or distributed with a grass-seed spreader and should be lightly raked in and then watered well for the first two months, if needed. Depending upon conditions, germination can be expected in one to two weeks.

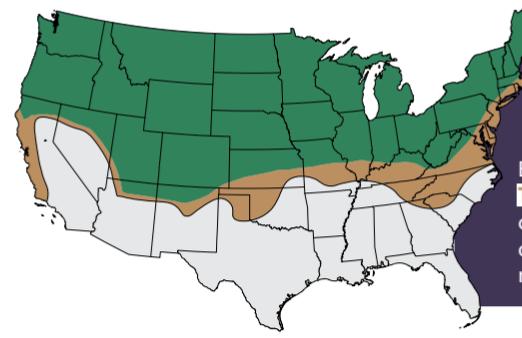

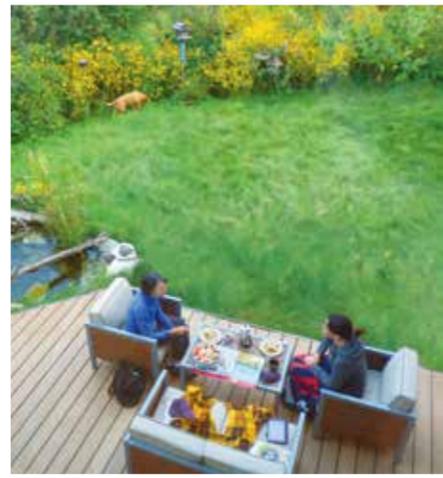

The cool-season nature of Eco-Grass shows in its bright-green luster in late autumn, followed by browning in dormancy and an early spring green-up.

**ECO-GRASS
SHIPS FREE!**

1-19 lbs..... \$7.75 / lb
 20-49 lbs..... \$6.75 / lb
 50-99 lbs..... \$5.75 / lb
 100+ lbs..... \$4.70 / lb

RECOMMENDED SEEDING RATE

5 lbs. per 1,000 sq ft
 220 lbs. per acre

RECOMMENDED PLANTING RANGE

Typical seasonal conditions in the **GREEN** areas are suited to growth of cool-season grasses like the fescues in Eco-Grass. Typical seasonal conditions in **TAN** areas are suited to growth of warm or cool season grasses but planting Eco-Grass on very dry, well-drained sites here is not recommended.

SHRUBS & TREES

Native shrubs and trees host a haven of ecological interactions, providing food and shelter for a staggeringly high percentage of pollinating insects, birds, and small mammals. Incorporate these foundational plant species to transform your property into a sanctuary that supports countless food webs.

Host plant for the Crocus Geometer

Pagoda Dogwood *Cornus alternifolia*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
FULL PART SHD	WET W/M MED M/D DRY	25'	May-Jul	6-12'	3-8

Clusters of fragrant white flowers are followed by dark blue berries. These fruits are rich in fats and vital nutrients for migrating or overwintering birds. Showcases architectural tiers of horizontal branches.

SEED: (10 seeds/pkt) **GERM CODE:** M
packet: **\$3.00**

PLANTS: bare root: **\$11 ea.** Age: 1 year Size: 18"

Host plant for the Luna Moth

American Hazelnut *Corylus americana*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
FULL PART SHD	WET W/M MED M/D DRY	8'	APRIL	2-6'	4-9

This shrub is at its showiest while the hazelnut develops, as shown above. The look and feel is that of a sticky wonton! It is a unisexual species, with separate male and female parts on the same branch; a single tree will produce nuts. Hazelnuts are edible and also called American Filberts. It is a rhizomatous tree, spreading by an underground root system.

PLANTS: bare root: **\$12 ea.** Age: 1 year Size: 18"

Host plant for the Red-Spotted Purple

Downy Serviceberry *Amelanchier arborea*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
FULL PART SHD	WET W/M MED M/D DRY	25'	APR-MAY	3-6'	4-9

Among the first trees to bloom in the spring, erupting in lacey white flowers. Young leaves have fuzzy undersides. Produces plentiful, reddish-purple berries in late summer. Foliage turns a coppery or burgundy color in the fall. An ecological interactions haven, supporting bug and bird populations alike, since most inland avians feed their hatchlings insects.

PLANTS: bare root: **\$12 ea.** Age: 1 year Size: 18"

Host plant for the Rosy Maple Moth

Bur Oak *Quercus macrocarpa*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
FULL PART SHD	WET W/M MED M/D DRY	80'	APR-JUN	20-30'	3-8

Create a canopy! Oak trees are the North American backbones of local food webs, capable of supporting over 90% of native insect and bird species. Bur Oaks are renowned for their broadly spreading limbs and immense shade cover once mature. Critical for restoring pollinator populations. Pair with understory plants for a soft landing. Plan for the future - plant an Oak today!

PLANTS: bare root: **\$12 ea.** Age: 1 year Size: 12"

photo: Ken Childs | TN

Red Osier Dogwood *Cornus stolonifera*

SUN	SOIL MOISTURE	HT	BLOOM	SPACING	ZONES
FULL PART SHD	WET W/M MED M/D DRY	10'	JUN-SEP	2-5'	3-7

This shrub's dark red stems against a fresh white winter snow may be its most attractive feature. Look forward to clusters of white flowers in early spring and white fruit in late summer. One of the host plants of the Spring Azure butterfly. The berries are a very important food source for a number of different kinds of wildlife in the fall and winter.

PLANTS: bare root: **\$11 ea.** Age: 1 year Size: 18"

GROWING YOUR PRAIRIE FROM SEED

Establishing a successful native planting from seed is a labor of love and patience. Most who have been through it will praise the process, the thrill of discovery and the absolute joy in transforming a space with little biological activity into a healthy ecosystem. You will delight in your efforts season after season as the plants and wildlife of the North American prairie become a part of your home landscape.

Year 1

SITE PREP & SEEDING

The first growing season should be dedicated to site preparation, a crucial first step to a successful planting. There are several different methods to accomplish this task. After site preparation is complete, seed can be sown.

Year 2

MOWING

Keeping the site mowed to 4-8" during the first year of growth will control any remaining weeds, allow sunlight to reach the slow-growing perennials, and promote strong root growth.

Year 3

PIONEER FLUSH

The season after planting there will only be a few native species that flower. This stage is known as the Pioneer Flush. It can take 3-5 years after planting for most perennials to bloom for the first time.

Year 4

DIVERSITY OF BLOOMS

As time goes on, more and more perennial wildflowers will start to bloom.

PRETTY DARN QUICK (PDQ) SEED MIX

Sun: ☀️☀️ Soil: Wet ☁️☁️☁️☁️ Dry

This top-selling mix includes "pretty-darn-quick" to-establish prairie flowers and grasses to provide more immediate color and a naturalized look. This mix contains all the colorful classics like Echinacea, Rudbeckia, and Monarda!

28 Wildflowers • 6 Grasses • 167 seeds / sq ft • 11.14 lbs / acre

500 sq.ft.	1,000 sq.ft.	1/8 acre
\$25.00	\$29.00	\$94.00

DEER RESISTANT SEED MIX

Sun: ☀️☀️ Soil: Wet ☁️☁️☁️☁️ Dry

This mix is composed of native species that deer tend to shy away from; plants with rough texture (Silphium species, Rattlesnake Master), milky sap (Milkweeds, Spurge), or strong aromas (Hyssop, Mint, Onion, Bee Balm).

35 Wildflowers • 7 Grasses • 116 seeds / sq ft • 11.67 lbs / acre

500 sq.ft.	1,000 sq.ft.	1/8 acre
\$30.00	\$38.00	\$135.00

BIRD BONANZA SEED MIX

Sun: ☀️☀️ Soil: Wet ☁️☁️☁️☁️ Dry

Support native birds during this time of massive decline! Fact: insects feed on native plants. Birds will seek insects to feed their young in your prairie. Included species also supply nesting materials, nutritious seeds, berries, nectar, and shelter.

34 Wildflowers • 6 Grasses • 94 seeds / sq ft • 13.17 lbs / acre

500 sq.ft.	1,000 sq.ft.	1/8 acre
\$34.00	\$47.00	\$181.00

POLLINATOR PALOOZA SEED MIX

Sun: ☀️☀️ Soil: Wet ☁️☁️☁️☁️ Dry

An all-out crazy party for bees & butterflies! Provide pollinators with high quality nectar and host plants for caterpillars. Includes many plants with a special value to bees classification given by the Xerces Society "Bring Back the Pollinators" campaign.

38 Wildflowers • 7 Grasses • 141 seeds / sq ft • 6.53 lbs / acre

500 sq.ft.	1,000 sq.ft.	1/8 acre
\$29.00	\$36.00	\$129.00

INSECTOPIA SEED MIX

Sun: ☀️☀️ Soil: Wet ☁️☁️☁️☁️ Dry

Great for anyone practicing integrated pest management. This mix will not only attract bees and butterflies, but also predatory insects that prey on garden pests. Design based on Xerces Society's Farming with Native Beneficial Insects: prairiemoon.com

38 Wildflowers • 6 Grasses • 89 seeds / sq ft • 8.69 lbs / acre

500 sq.ft.	1,000 sq.ft.	1/8 acre
\$30.00	\$39.00	\$141.00

SEPTIC SAFE SEED MIX

Sun: ☀️☀️ Soil: Wet ☁️☁️☁️☁️ Dry

Nature's original filtration device! Native plants have root systems that prevent soil erosion while absorbing excess moisture and *ahem* nutrients. These species are rugged; thriving in gravel above, and withstanding heat emitted from below.

26 Wildflowers • 8 Grasses • 175 seeds / sq ft • 12.72 lbs / acre

500 sq.ft.	1,000 sq.ft.	1/8 acre
\$39.00	\$56.00	\$226.00

FLOWER-ONLY ENHANCEMENTS

ADD MORE COLOR AND DIVERSITY TO YOUR NATIVE PLANTING

Our pre-designed Seed Mixes consist of a wide range of species, abundant seed quantities, and blooms from spring through fall. Some customers have expressed interest in enhancing the overall color scheme, expanding the variety of species, or increasing seed counts to better contend with weeds within an established or growing native plant community. These Seed Mix Enhancements are also great options for oversowing existing native sites.
